

DRIVELINE SYSTEMS

Delivering tailored solutions & superior customer support for OEMs around the world

Choose Nexteer Driveline for:

- **Tailored**, Efficient, Low-Mass Solutions
- **Seamless** Vehicle Integration
- **Exceptional** Durability
- **Superior** NVH Performance & Comfort
- **Diverse** Product Portfolio + Over 60 Years Experience
= **Better Value, Solutions & Options**

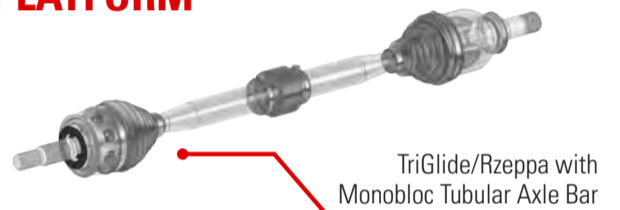

DRIVELINE SOLUTIONS FOR EVERY VEHICLE PLATFORM

Nexteer's wide range of halfshaft technology solutions can accommodate various configurations – and we can also custom-engineer components to meet an OEM's specific needs including challenging NVH requirements in EVs.

With our driveline solutions, OEMs get:

- Durable, dependable solutions for high-efficiency front-wheel drive vehicles
- High-performance halfshafts that enhance the driving experience in all-wheel drive vehicles
- Compact, low-lash solutions for rear-wheel drive vehicles

SOLVING CHALLENGES ACROSS INDUSTRY MEGATRENDS

ELECTRIFICATION

EVs drive demand for high-efficiency joints, lower mass and premium NVH halfshaft designs, like those from Nexteer. Halfshaft designs meet expanded fatigue requirements due to increased torque and regenerative braking needs in EVs, and specialized joint types are needed for enhanced NVH and efficiency needs due to the quietness of EVs.

SHARED MOBILITY

Nexteer's advanced driveline solutions enable higher durability to support autonomous people movers, last mile delivery vehicles and more. Increased durability is critical for shared mobility applications that will have a massive increase of driving hours in shorter time periods.
